

Need More Books?

The Libronix Digital Library System allows you to build a library tailored to your specific study needs! In addition to the books you have already purchased, there are thousands more books from over one hundred publishers that can be integrated into the Libronix Digital Library System. You can purchase these books a number of different ways.

Option 1. Logos.com features more books you can download individually or buy as boxed collections. This is your best source for the newest titles in the ever-expanding Logos digital library.

**Freebies are
always nice.**

Learn how easy it is by downloading your free books now at www.logos.com/freebooks

Option 2. Use our simple unlocking process within the Libronix DLS to unlock books on discs you already have. Simply start Libronix and click Tools > Unlock Resources. The purchase transaction can be completed by Internet or telephone.

Option 3. Buy from your local Christian bookstore. Any package that carries the Libronix DLS or Logos Library System icon will integrate easily into your digital library!

Installation Guide

Logos Bible Software 3

3 Easy Steps to Installation

Install | Activate | Save

Watch an online tutorial video on the whole process at:
www.logos.com/installation

Problems or Questions?
Call Customer Service at **800.875.6467**

1 Install the Libronix Digital Library System

- A. Close all programs.
- B. Place your Logos CD or DVD in the drive. If you have a set of discs, use the disc labeled **"Use First."** The installation should start automatically once the disc is inserted into the drive.

The installation does not start? Navigate to your CD or DVD drive (you should see a red Libronix icon). Right click on the icon and click Open. Double-click Setup.exe to begin the installation.

- C. Follow the on-screen instructions to install the software. Make sure to restart your computer if you are prompted to do so. Leave your installation disc in the drive so the installation can continue following the restart.

Once the installation is done, open Libronix from your list of Programs or click on the red and white icon on your desktop.

2 Activate Your Product

Important! In order for your product to remain fully functional it must be activated within 45 days of installation.

- A. Click the Account Management link in the pop-up window that appears. If the pop-up window doesn't appear, click on **Tools > Account Management**. Enter the 20-character alphanumeric serial number printed on the sticker affixed to the CD or DVD packaging.

Note: If you are upgrading from an existing Series X collection and you have not received a serial number, your collection will be unlocked once you have synchronized (step 2.C).

- B. Once you submit your serial number, select the option that best describes you:

- You have never installed Libronix on this or any other computer.
 >> Create a "New User" account and enter your information
- You have activated a Libronix-compatible product on a different computer.
 >> Select the "Existing User" option (You have a Customer ID & Confirmation Code.)

Note: Your Customer ID may be an old email address you no longer use. If you don't have your customer information or a license backup file, send an email to support@logos.com for this information. If you are unsure about your Customer ID, please email Customer Service before attempting to create a new user account. If you do not have internet access, call (800) 875-6467.

- C. Complete the activation of your product by selecting one of the three activation options. If you are online, select "internet" to complete the process. Allowing the software to Synchronize Licenses with our server will ensure that your licenses are up to date. Go to **Tools > Library Management > Synchronize Licenses** if you are not directed to do so.

Get the most out of your new software! Learn how to use it by watching free tutorial videos on our website: www.logos.com/videos

3 Save Books to Your Hard Drive

- A. Account Management will prompt you to insert your disc(s) into the hard drive. This step will allow you to access your digital library without the disc in the drive.

>> Installing from a DVD

The resource discovery process may take 10 to 20 minutes.

>> Installing from a CD set

Insert 'Disc A' and wait for Libronix to discover resources and copy them to your hard drive. Once this is done repeat the process with each disc. Depending on the collection you purchased, some discs may only contain locked resources.

- B. If you decline to allow Libronix to automatically copy your resources (or to copy resources at a later time) navigate to **Tools > Library Management > Location Manager**. With this tool you can manually select the resources you would like on your hard drive.

Note: If done at a later time, with Libronix open, insert a CD or DVD into the drive and look for the words "Discovering Resources" in the bottom right-hand corner of your screen (right above the clock).

Do not use the keyboard or mouse until these words disappear.

When Discovering Resources disappears, a Tip box may prompt you to go to Location Manager.

In Location Manager (from step B), make sure these words appear in the **"List Resources"** box: **Unlocked on Removable Media**

Also, make sure this address is in the **"Destination"** box: **C:\Program Files \Libronix DLS\Resources**

Now, click on Copy Resources to save books to the hard drive. Once the words **"All Unlocked Resources Have Been Copied to Your Hard Drive"** appear, your books are on the hard drive. You can check your My Library for your books. Be sure the Collection field is set to **"All Unlocked Resources."**

DO NOT MISS THIS! Save Time in the Future

Important! The Libronix DLS is licensed to one user. The license agreement allows you to have the program installed on two computers that you own, at one time. You may install the software on up to two computers for personal use only.

Write Down Two Key Pieces of Information: Doing this will make future installations simple!

In the Libronix Toolbar, Click **Help > About Libronix DLS**

CUSTOMER ID: _____

*If your CID is your email address, it's an arbitrary ID code within the program and will remain your Customer ID, even if your email address changes.

CONFIRMATION CODE: _____

*This is different from a product's serial number/activation code.

Following steps 1, 2, & 3, use these codes for future installations. From now on, always select the "Existing User" option.
