

Press Release

Date: March 13, 2002

Contact: Daniel Foster (360) 685-2314, Dan Pritchett (360) 685-2335

Release: Immediate

Logos Research Systems, Inc., Announces the Release of Logos Bible Software Series X —The World's Most Powerful Bible Software Is Now the World's Easiest Bible Software—

Logos Research Systems, Inc., has released an all-new version of its best-selling Bible software. Logos Bible Software Series X is the culmination of ten years of pioneering research and development. The product harnesses the power of today's computer to reduce the tedious, time-consuming lookup and preparation tasks associated with Bible study.

Logos Bible Software Series X is built on the Libronix Digital Library System—a technology used to deliver digital libraries of books and interactive study tools. Books from multiple publishers are automatically integrated into a single digital library on the user's system.

Ease of Use

First-time Bible software users are able to operate Logos Bible Software Series X because they can simply key in a passage or topic and click "go." The software takes over from there and thoroughly searches the user's digital library, providing an abundance of links to meaningful material in just seconds. This benefits users who want to achieve a deep Bible study but whose time is in short supply.

"It's like having a personal research assistant who remembers your preferences and even thinks of relationships between topics or keywords that may not have occurred to you," said Dale Pritchett, Vice President, Sales and Marketing. "The computer handles the boring repetitive tasks, leaving you more time to explore, discover and apply."

Expandability

Logos Bible Software Series X allows for massive expansion of the user's digital library. For example, the Logos Bible Software Series X Scholar's Library contains more than 230 Bibles and Bible reference titles worth over \$5,000 in equivalent print editions. And users can purchase additional titles and add-in collections to expand their digital library. Currently, the core engine can read over 3,000 titles from more than 100 publishers with more texts being added all the time.

Free Upgrades for Life

Core reader updates are always available free of charge via download to ensure compatibility with the newest Windows operating systems. Logos Bible Software Series X is compatible with all the latest Windows operating systems including Win98/ME/XP/NT/2000.

About the Company

Logos Research Systems, Inc., a privately held corporation located in Bellingham, Wash., is the worldwide leader in multilingual tools and resources for electronic Bible study. The company serves church, academic and lay markets in more than 140 countries with software in 11 languages. Logos can be found on the web at: <http://www.logos.com>

Libronix Corporation, a wholly owned subsidiary of Logos Research Systems, Inc., delivers technology and services that help publishers build one-to-one relationships with users through an integrated, commerce-enabled digital library system. Libronix can be found on the web at: www.libronix.com
