

CREDIT CARD DETAILS

Supporters can also pay by check (recommended) and cash, but in order to get the most from your fundraiser, you'll want to offer your supporters the ability to pay for their software via credit card. To do so, you'll need a secure Wi-Fi connection, a card reader, and a compatible device listed below. If you don't have one of the mobile devices listed below, you can arrange to have one sent to you for the event by calling Logos at (800) 875-6467 ext. 4423.

Getting Started

Step 2: One month prior to the event, call us at 800-875-6467 ext. 4423 so that we can ship you a **Plug-In Credit Card Reader** and set you up with login credentials so that you can process orders.

Step 1: Download the free **Intuit GoPayment App** by going to the App Store, the Android Market, or the Blackberry App World.

Step 3: Once you have credentials (you will receive an email from us to create your account), launch the GoPayment app and login with the account you created.

Step 4: Set up the app for sales using the following information on the **Settings** tab:

Settings

If using an Android or BlackBerry device, enable the card reader by selecting "**Choose Swiper.**"

Audio Jack Swiper: On

Location: On

Items: On

Edit Items

Create an item for each of the six Logos base packages featured on the [OrderForm.pdf](#).

Item Name: (e.g., *Scholar's Library*)

Description: 15% off Logos 4 for Youth Group Fundraiser supporters!

Price: (e.g., \$503.96)

% Sales Tax: On

Sales Tax: Appropriate sales tax rate.

REMINDER: Since the device runs through the audio jack, please remember to set volume to **MAXIMUM** level when using it. If you need help, please call Logos at (800) 875-6467 ext. 4423.

That's it. You're ready to start raising funds!

Transactions Are Secure

Intuit makes TurboTax, QuickBooks, Quicken, and Mint, and takes the protection of customer financial information VERY seriously. Among the ways they safeguard your transactions: the card reader encrypts the data it collects, sensitive card information is never stored on your phone, and GoPayment adheres to strict online banking industry standards. Plus, each user has a unique login and password, so even if you lose your phone, no one can access your app. For more information, visit <http://gopayment.com>
